

REMTECH EXPO 20-24 SEPTEMBER 2021

International event on Remediation, Coasts, Floods, Climate, Seismic risk, Regeneration, Industry

REMTECH EXPO PLATFORM: 81 THOUSAND VISITORS FROM 88 COUNTRIES

*After than a month from the RemTech Expo Digital Edition 2020, the numbers don't stop! There are **81 thousand** (+ 11 thousand) accesses to the platform that from **88 countries** (+9) around the world continue to connect to stay up to date and take advantage of the services and technologies of the best companies but also of the projects of the institutions, conferences and refresher courses .*

Infrastructures, Regeneration, Built Environment and Circular Economy, Water, Climate and Economy, Coasts, Ports and Sea, Industry and Chemistry are just some of the sectors studied by **over 1000** experts in the sector in **+300 conferences** at any time available on the platform, which will remain active throughout the year.

Excellent institutional presences at the event including the Presidency of the Council of Ministers with the "Benessere Italia" control room and Casa Italia, the European Parliament, the Ministry of the Environment, the Ministry of Infrastructures, the Ministry of University and Research, Ispra, The National Research Council, the Government Commissioner for the reclamation of illegal landfills and all the companies that can still be contacted directly through the dedicated rooms and chats, at any time within the platform.

Francesco Santini, Herambiente Reclamation Manager *"We consider it an agile and safe tool, certainly in line with the reduction of impacts, with the cancellation of transport, waiting times and also in some way reducing the consumption of utilities. During the week, numerous contents, ideas, proposals were shared, but also the level of international technical meetings and in parallel the specific "one to one" meetings were positive: so in our opinion the experience is positive"*.

Moreover, two new appointments have been organised and are now available on the platform **"The role of the RUP in the remediation of contaminated sites"** and **"The role of municipalities in the management of reclamation and waste in Campania "**.
